

## Nuragrid Installation Guide for Turf

1. Sweep substrate clear of debris.
Install Nurajacks and Nuragrid as per Installation Video found <a href="#">HERE</a> . Install additional Nurajacks in the centre of each Safety Grid as required.
2. Ensure Nuragrid is flat, firm and stable. Check surface with 1.8m straight edge.
3. Install additional Nurajacks as required.
4. Ensure Nuragrid layout enables outlets to be accessible for cleaning.
5. Roll selected turf onto Nuragrid following manufacturer's instructions.
6. Consider screwing perimeter of turf at recommended intervals with 10G x 30mm stainless steel wood screws.
7. If installing tiles/pavers, follow Nurajack Nuragrid Installation Guide for tiles/pavers.
8. Weight off turf with sand as per manufacturer's instructions, taking care not to allow sand onto tiled/paved areas. Precautions should be taken to minimise sand tracking to drainage outlets.
9. For areas with no containment, install Nurajack Tile Edge Trim with 10G x 30mm stainless steel wood screws to perimeter. Install vertical tile as necessary.
